

AQUA DOUCHE

PROPERTIES

AQUA DOUCHE is a **silica-based** water dispersing resin aimed at ensuring the **saturation of grounds** and the **tightness of substrates** before tiling all sealed floor linings (DTU 42.1 for sealed floor linings).

AQUA DOUCHE can be applied **both inside and outside** on all types of surfaces such as concrete, cellular concrete, plaster, plasterboard, floor tiles, aluminium, zinc.....

AQUA DOUCHE is ideal for a perfect tightness in numerous elements such as : **balconies, terraces, bathrooms, « Italian-style showers », flower stands,....**

AQUA DOUCHE remains **flexible** when dry. Therefore, there is **no need for bridging strips** in the angles. Since it **dries very fast**, it can be coated **within an hour** unlike other **similar products on the market** which saves **considerable time**.

Moreover, **AQUA DOUCHE's siliceous structure** allows considerable **improvement** in tiling glue **bonding power**.

INSTRUCTIONS FOR USE

AQUA DOUCHE can be applied either with a roller or a brush in two thin layers. The thickness of the final coating must be at least **0,4 mm** .

On old and porous surfaces :

Slightly damp the surface before application. It is highly recommended to apply thick layers in the angles.

Consumption : *Approximately 2 to 5m² per kg depending on the surface to be treated.*

Séchage : Allow 20 to 30 mn between two layers before tiling. The ambient temperature and the surface to be treated must both be between +5 and +30°C.

ATTENTION :

When applied in very thick layers, AQUA DOUCHE may be very slow to dry with possible cracking, crazing or crumbling. (8 août. 14)

It is essentiel to cover AQUA DOUCHE with a screed, floor tiles or any other material to ensure proper UV protection.

IMPORTANT :

Never apply **AQUA DOUCHE** on a frozen surface nor in freeze-prone conditions within 24 hours.

Do not apply **AQUA DOUCHE** when temperatures are too high, in full sun conditions or with a desiccating wind. Rinse the material thoroughly with water before drying.

For further information, refer to data sheet CSTB N° 2843.

SAFETY PRECAUTIONS

Keep away from extreme cold and heat.
Do not use in swimming pools or basins.
Cannot be used for food containers.
Non toxic, harmless for skin.

For professional use only.
