

# DECACOLOR

## PROPERTIES

**DECACOLOR** is a stripper combining **several acids** (phosphoric, citric et chlohydric) and surface active agents.

**DECACOLOR's** revolutionary formula (world patent) entails a **change in the colour of the product** depending on the **dilution**, which allows a **visual control to adjust concentration** to the cleaning task

**DECACOLOR** allows **immediate cleaning of laitance, efflorescence and cement residues** on all surfaces as well as zinc pickling prior to welding **without smoke emissions**.

**DECACOLOR** is the best product to **descale** and **eliminate lime deposits**.

Being **multi-purpouse**, **DECACOLOR** also allows to clean **all dirty surfaces** (facades, terraces, pool decking,...) whatever the material (**stone, floor tiling, rendering, concrete, etc...**);

**DECACOLOR's** high emulsifying power allows to clean **oils and greases**.

**DECACOLOR** contains a **powerful corrosion inhibitor** (ideal for reinforced concrete, does not attack reinforcements)

## INSTRUCTIONS FOR USE

**DECACOLOR** can be used **pure or diluted** according to the needs. **The colour of the product indicates the level of concentration**.

**RED** : Pure : Only to be used for **very difficult stripping**.

**ORANGE** : High concentration: use for **thorough cleaning** and **pickling**.

**YELLOW** : Eliminates cement residues in concrete mixers , work site materials, lorry sideboards, etc... **Cleans after tile laying**.

**GREEN** : Renovation of **dirty floors** (workshops, garages, service stations) and **pickling of floors** before painting.

**BLUE** : For a **smooth cleaning** on all surfaces. Efficient enough to eliminate **cement or lime veil** on floor tiling, for example.

### Important :

It is a **reversible system** : If dilution is too high, just add more product until you get **the appropriate colour**.

### Rinsing :

The product is **neutralized by water**. Neutralization is complete **when the blue colour has vanished**.

## SAFETY PRECAUTIONS

**S26**: In case of contact with eyes, rinse thoroughly with water and see a doctor.

**S36/37/39** : Wear adequate protective clothes, gloves and a face mask

**R20/21/22** : Toxic when inhaled, ingested or in case of skin contact.

**R41** : Risk of severe eye damage.
